Network ▼

Network Topology

Networks

Routers

Security Groups

Load Balancers

Floating IPs

Orchestration >

Go to the section «Network/Floating IPs» on the left-side menu

Click on «Disassociate» for the IP

Project / Network / Floating IPs

### Floating IPs

Floating IP Address = ▼

Filter

🔗 Allocate IP To Project

🔗 Release Floating IPs

Displaying 4 items

<input type="checkbox"/>	IP Address	Description	Mapped Fixed IP Address	Pool	Status	Actions
<input type="checkbox"/>	131.175.206.132		tutorial-test 192.168.0.97	externalNetwork	Active	Disassociate ▼

# 1- Delete your VM

## 1.1 - Disassociate the floating IP from your VM

If desired, you can also **release the floating IP**.

**Important:** once you release it, there is no guarantee the same IP can be allocated again.

Project / Network / Floating IPs

### Floating IPs

Floating IP Address = ▼

Filter

Allocate IP To Project

Release Floating IPs

Displaying 4 items

<input type="checkbox"/>	IP Address	Description	Mapped Fixed IP Address	Pool	Status	Actions
<input type="checkbox"/>	131.175.206.132		-	externalNetwork	Active	Associate ▼
<input type="checkbox"/>	131.175.204.11		vm-share-1 192.168.0.99	externalNetwork		Release Floating IP ▼

Click

# 1- Delete your VM

## 1.2 - Delete instance

Access your cloud resources

Delete your VM

Delete your network

Go to section «Compute/Instances» on the left-side menu

Display the drop-down menu of the instance you want to delete

Project / Compute / Instances

### Instances

Displaying 7 items

	Instance Name	Image Name	IP Address	Flavor	Key Pair	Status	Availability Zone	Task	Power State	Age	Actions
<input checked="" type="checkbox"/>	tutorial-test	Ubuntu Server 21.04 (Hirsute Hippo)	192.168.0.97	fl.ada.xxs	tutorial-test	Active	nova	None	Running	27 minutes	Create Snapshot

- Associate Floating IP
- Attach Interface
- Detach Interface
- Edit Instance
- Attach Volume
- Detach Volume
- Update Metadata
- Edit Security Groups
- Edit Port Security Groups
- Console
- View Log
- Rescue Instance
- Pause Instance
- Suspend Instance
- Shelve Instance
- Resize Instance
- Lock Instance
- Soft Reboot Instance
- Hard Reboot Instance
- Shut Off Instance
- Rebuild Instance
- Delete Instance

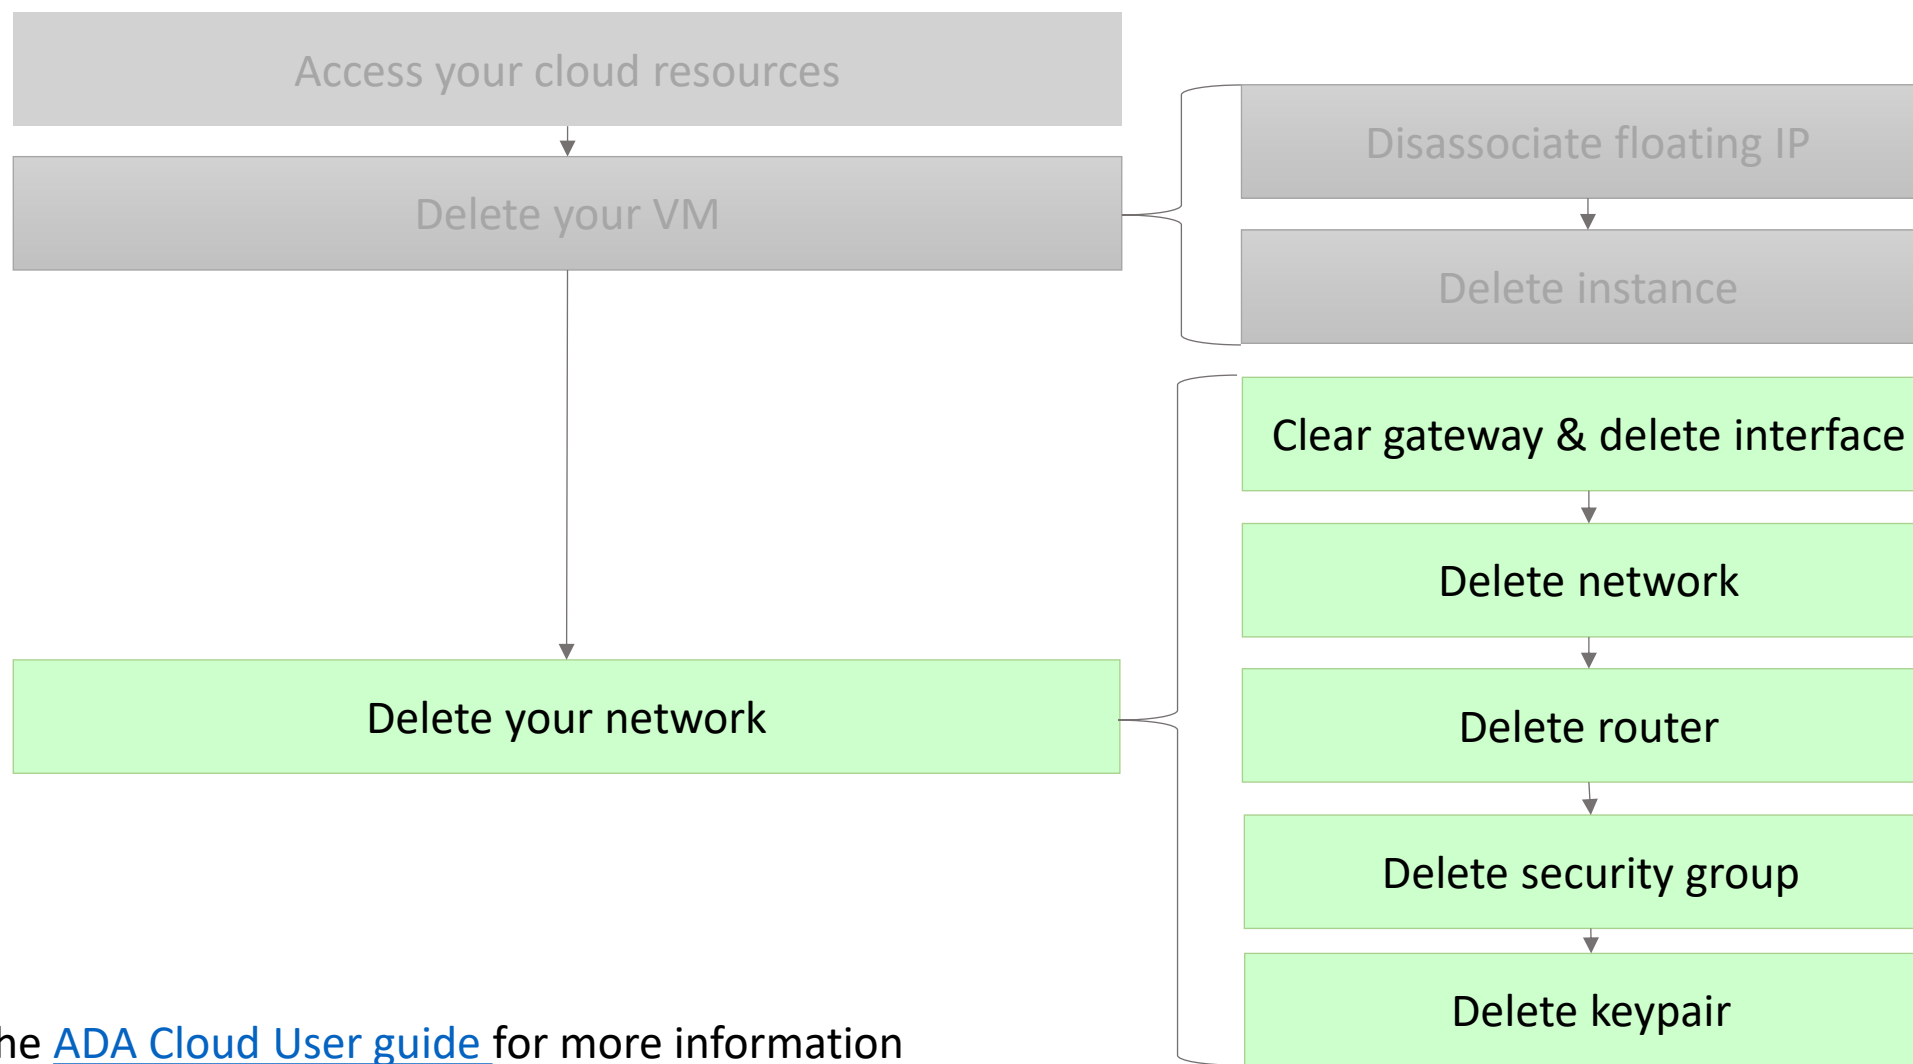

Click the action «Delete Instance»
